Count to Three and the Installation COMPLETE!

WATER PROOF | DUST PROOF | SHOCK PROOF

ED600 External Enclosure

ED600 External Enclosure is a sturdy and durable enclosure with an impact-resistant silicone rubber inner lining design and IP54 water & dust resistance that protects various models of 2.5" HDD or SSD. The ED600 is compatible with laptops, PC, PS4, XBOX One, and other video game consoles. Tool-free installation and one-key switch make it accessible for even a beginner with computers to use it. The ED600 is the essential external HDD/SSD for protecting your data!

One-Key Switch & Tool-free! Comprehensive Protection

Thanks to a considerate safety lock and tool-free design, installation can be done in a few simple steps. Just open the ED600, insert a drive, and close it up, and then it is ready for use!

Compatible with HDD and SSD

ED600 is compatible with both HDDs and SSDs and uses USB 3.1 for high-speed transmission. With a transmission efficiency as high as up to 5Gb/s, it can let you enjoy the high-speed data transmission anytime and anywhere.

Open Cover | Insert SSD / HHD | Replace Cover

IP54 Water & Dust Resistance

ED600 has passed the IP54 Test for its high dust & water resistance that can properly keep out the intrusion of dust and effectively protect the data from being damaged by water seepage. It can be taken anywhere without fear of an accident!

Vibration-Resistant Design

ED600 has a vibration-resistance design with thick and solid silicone rubber in its interior to provide the HDD/SSD with the powerful protection needed to protect an HDD/SSD, as well as the data inside, from an accidental drop.
