

Product name: ENDORFY Scrim YL
Product code: EY8A003

The ENDORFY Scrim YL is comfortable and looks good in a comic book color scheme — it's no coincidence that [superheroes](#) choose yellow.

It has a wide seat and a tall, profiled backrest with memory foam cushions that stabilize the cervical and lumbar regions. Simply speaking, you can ~~work~~ [conquer the world](#) for hours, and your back will think you're literally on cloud nine... Especially since you can adjust practically every element of our computer chair — the angle of the backrest (from 90° to 150°), the seat (up-down), and the armrests (up-down, parallel right-left, front-back, and around its axis). The ENDORFY Scrim YL is equipped with a top-of-the-line gas-lift with a lifting capacity of up to 120 kg, so you can spin right 'round, baby.

~~Throne~~ [Seat](#) for champions

The Scrim YL is a real ~~throne~~ [seat](#) for champions. Just sit down and do your thing — nothing will twist you like in a horror movie... Well, unless you choose to set the backrest to some strange position.

That's thanks to the wide seat and high backrest made of cold-pressed foam that masterfully keeps its form even after months of intensive use. You also get two memory foam cushions, which stabilize the spine in strategic places — the cervical and lumbar sections. We adjusted them for people between 1.70 and 1.95 meters tall.

You + the Scrim YL = <3

When you spend half your life at the PC, you know all the nasty things a computer chair can do to your spine. That's why we made sure that the Scrim BK [fine-tunes](#) to you at all strategic points.

Simply adjust every element of the chair and you're good to ~~go~~ [sit](#). You can change the height of the seat (450-490 mm), set the armrests (up-down, parallel right-left, front-back, and around its axis), and the angle of the backrest (from 90° to 150°).

The Scrim YL also has a multilock mechanism. In practice, this means that you can choose one of five seat angles — or unlock it completely. Multilock harmonizes with a wide range of backrest adjustments, so you can choose the most comfortable position. The whole thing is held up by the [highest](#) — fourth — class of a gas-lift that holds up to 120 kg (or 150 kg, if you don't move).

~~Just breathe~~ [breathable materials](#)

The Scrim YL will last for years. We finished it with two types of durable material — PU leather on the sides and breathable fabric that ensures air circulation on the seat and backrest. You can ~~work~~ [play](#) for hours without the risk of getting as hot as a PC after a full night of gaming on the highest settings.

In the summertime. Without air conditioning.

ENDORFY Scrim YL — main features:

- Eye-catching design

- Comfortable construction
- high-quality PU leather and breathable fabric
- Multi-level regulation
- 4D armrests
- Multilock mechanism
