

Product name: ENDORFY LIX Plus
Product code: EY6A001

The ENDORFY LIX Plus is our love at first ~~sight~~ [click](#). It fits the hand like a glove and carries out commands at a speed of light, all while reigning over the featherweight category at 59 g. And its level of epic? Over 9000.

It has a very particular set of ~~skills~~ [high-end components](#) – such as the battle-proven Kailh GM 8.0 microswitches. Ultra-fast and durable, their lifespan is estimated at 80 m clicks, so you won't have to plan your gaming retirement anytime soon. But, of course, it's the sensor that's the real MVP here – meet the PixArt PAW3370, capable of turning even subtle maneuvers into wide (and wild) movements on the screen. So do everything you want, it'll keep up.

Go [Click](#) for it!

In a world where you gotta be fast to win, there's no time to waste. But other than fast, your movements need to be precise too. LIX Plus gives you the accuracy you always dreamt of – unlock your true potential and become the unstoppable winning machine.

Just ~~go~~ [click](#) for it!

The insane performance lies in the state-of-the-art PixArt PAW3370 sensor. It's a weapon of the highest caliber, just look at the numbers: sensor with a maximum sensitivity of 19 000 DPI, which transforms every subtle mouse movement into an epic maneuver on the screen. But the high-tech sensor comes with other perks too – it's flexible and adapts to your playstyle. You can fine-tune its Lift-Off distance, polling rate, and even debounce time for that extra edge against your opponents. Imagine the possibilities!

Breathable shell

It's called "honeycomb" and it's one of the secrets behind the ultralight weight of the LIX Plus. But it doesn't only keep it slender, it also saves your hand from sweating – even during clicking marathons.

BTW. In Roman numerals "LIX" equals 59. Get it?

The breathable housing ensures proper air circulation and keeps your busy hand cool. Additionally, The LIX Plus is equipped with slick PTFE feet to make sure it'll slide across any mousepad effortlessly.

Like greased lightning

With the LIX Plus you're like greased lightning – fast and furious. Thanks to the super-responsive mechanical Kailh GM 8.0 microswitches, you'll get rid of your enemies before your teammates decide to "rush B".

The Kailh GM 8.0 are not only quick to act but also long-lasting – their lifespan estimated at 80 m clicks means you can click to your heart's delight. If you're in the market for reliable microswitches that'll last years, then place your bets on the Kailh GM.

Beauty and a beast

Let's face it – the LIX Plus looks epic. Make it truly unique by customizing its ARGB backlight to match the colors of your war room.

With the LIX Plus, can backlight the ENDORFY logo, the scroll wheel, and even the strip around the back of the case. Pick your own color or use one of the predefined effects – you can also quickly change the configuration using the dedicated software.

1.8 m of freedom

An unwieldy cable tugging at your mouse in the middle of a scrim is every technology hero's worst nightmare. We've cried over spilt ~~milk~~ [energy drinks](#) countless times, but you don't have to. LIX Plus' long and soft cable is our new MVP.

Our "paracord" cable is more flexible than you'd expect. Its outer sheath of woven fiber has one job only – to protect the cable from damage. It's soft and light like your childhood teddy bear, so it won't interfere with your work. Additionally, it's 1.8 m long – plenty enough for the LIX Plus to slide freely across the mousepad.

Trust your ~~guts~~ [LIX's software](#)

With LIX Plus you ~~live~~ [click](#) as you like. Thanks to the dedicated software, you have full control over the mouse and all its perks. Make your own rules – change the sensitivity and LOD, customize the ARGB backlight, and record macros.
